Preface to the Third Edition (ix)
Preface to the First Edition (xi)

1. INTRODUCTION 1-40
   1.1 Pharmacognosy—A Brief History 1
   1.2 Importance of Natural Drug Substances 5
      1.2.1 Serve as Extremely Useful Natural Drugs 5
      1.2.2 Provide Basic Compounds Affording Less Toxic and
            More Effective Drug Molecules 10
      1.2.3 Exploration of Biologically–Active–Prototypes Towards
            Newer and Better Synthetic Drugs 10
      1.2.4 Modification of Inactive Natural Products by
            Suitable Biological/Chemical Means into Potent Drugs 13
   1.3 Natural Drug Substances: Cultivation and Production 15
      1.3.1 Plant Products 15
      1.3.2 Cell-Culture Techniques 16
      1.3.3 Microbial Metabolites 16
      1.3.4 Animal Derivatives 18
   1.4 Phytochemistry 19
      1.4.1 Constituents 21
      ∗ Further Reading References 39

2. PHARMACOBIOTECHNOLOGY 41-83
   2.1 Introduction 41
   2.2 Theory 42
      2.2.1 Mutation, Crossing-Over and Recombinant of Meiosis 43
      2.2.2 Third Revolution in Modern Medicine 43
      2.2.3 Genetic Code 44
      2.2.4 Specific Sets of Genes in Each Individual Organ 44
      2.2.5 Reverse Transcriptase (RT) 44
      2.2.6 3D-Proteins (xiii)
2.3.2 Restriction Enzymes 47
2.3.3 DNA–Ligase 48
2.3.4 Cloning Vector 48
2.3.5 Hybridization Probes 49
2.3.6 Cloning Process 50
2.4 Recombinant Proteins 58
  2.4.1 Bacterial Systems 58
  2.4.2 Glycosylation 59
  2.4.3 Mammalian Tissue Culture Expression Systems 60
2.5 Biotechnology Vs Modern Pharmacy Practice 60
  2.5.1 Human Proteins as Drugs 61
  2.5.2 New Drug Classes 63
  2.5.3 Vaccines 64
  2.5.4 New Immunodiagnostic Agents 66
  2.5.5 DNA Probes and RFLP Analysis 68
  2.5.6 Enzyme Linked Immunosorbant Assay (ELISA) 69
2.6 Biotechnology Based Pharmaceuticals for the Millennium 71
  2.6.1 Genetically Engineered Vaccine 72
  2.6.2 Gene Splicing and DNA Recombinant Procedures 73
  2.6.3 Antibodies in Biotechnology 75
  2.6.4 Gene Therapy 77
  2.6.5 3D Picture of the ‘Lock’ and ‘Keys’ 78
2.7 Biotechnology and Modern Drug Discovery 79
  2.7.1 Approved Medicines 79
  2.7.2 Medicines Under Development 80
  2.7.3 Human Clone 80
2.8 Biotechnology: Some Thought Provoking Newer Ideas 82
  2.8.1 Potato Vaccine 82
  2.8.2 Functional Food Revolution 82
* Further Reading References 82
2.7 From Nervous System to Immune System

2.8 Body's Defence Mechanism

2.9 PCR in Forensic and Research

2.10 DNA in Metabolic Pathways

2.11 Recombinant Vaccination Vector

2.12 OKT3—Monoclonal Antibody

Important Means in Biotechnology

3.1 Recombinant DNA (rDNA)

3.2 Restriction Enzymes

3.3 DNA—Ligase

3.4 Cloning Vector

3.5 Hybridization Probes
3. CARBOHYDRATES

3.1 Introduction 84
3.2 Classification 86
  3.2.1 Homoglycans 86
  3.2.2 Heteroglycans 100
3.3 Carbohydrate Biogenesis 119
  * Further Reading References 120

4. GLYCOSIDES

4.1 Introduction 122
  4.1.1 O-Glycosides 125
  4.1.2 S-Glycosides 125
  4.1.3 N-Glycosides 126
  4.1.4 C-Glycosides 126
4.2 Classification 127
  4.2.1 Anthrace Glycosides (Anthraquinone Glycosides) 127
  4.2.2 Phenol Glycosides 139
  4.2.3 Steroid Glycosides 144
  4.2.4 Flavonoid Glycosides 157
  4.2.5 Coumarin and Furanocoumarin Glycosides 168
  4.2.6 Cyanogenic Glycosides 173
  4.2.7 Thioglycosides 179
  4.2.8 Saponin Glycosides 182
  4.2.9 Aldehyde Glycosides 195
  4.2.10 Bitter Glycosides 196
  4.2.11 Miscellaneous Glycosides 200
4.3 Biosynthesis of Glycosides 202
  4.3.1 Biosynthesis of Anthracene Glycosides 203
  4.3.2 Biosynthesis of Phenol Glycosides 204
  4.3.3 Biosynthesis of Steroid Glycosides 204
  4.3.4 Biosynthesis of Flavonoid Glycosides 204
  4.3.5 Biosynthesis of Coumarin and Furanocoumarin Glycosides 205
  4.3.6 Biosynthesis of Cyanogenetic Glycosides 207
  4.3.7 Biosynthesis of Thioglycosides 209
  4.3.8 Biosynthesis of Saponin Glycosides 209
  4.3.9 Biosynthesis of Aldehyde Glycosides 210
4.4 Profile of Glycosides in Natural Plant Sources 210
  * Further Reading References 214
5. TERPENOIDS 215-339
  5.1 Introduction 215
  5.2 Classification 218
    5.2.1 Monoterpenoids 218
    5.2.2 Sesquiterpenoids 228
    5.2.3 Diterpenoids 233
    5.2.4 Triterpenoids 236
    5.2.5 Tetramerpenoids and Carotenoids 238
    5.2.6 Volatile Oils (Essential Oils) 240
    5.2.7 Resins and Resin Combinations 306
    5.2.8 Oleoresins 323
    5.2.9 Oleo-Gum-Resins 328
* Further Reading References 338

6. PHENYLPROPANOIDS 340-371
  6.1 Introduction 340
  6.2 Classification 340
    6.2.1 Hydroxycinnamic Acids 341
    6.2.2 Phenylpropanes 344
    6.2.3 Coumarins 345
    6.2.4 Abridged Phenylpropanoids 354
    6.2.5 Biphenylpropanoid Derivatives 361
    6.2.6 High Molecular Weight Phenylpropanoids 366
  6.3 Biosynthesis of Phenylpropanoids 369
* Further Reading References 371

7. ALKALOIDS 372-546
  7.1 Introduction 372
    7.1.1 Nomenclature 374
    7.1.2 Occurrence and Distribution in Different Organs of Plant 374
    7.1.3 Site of Formation of Alkaloids in Plants 377
    7.1.4 Function of Alkaloids in Plants 377
    7.1.5 Isomerism 378
    7.1.6 General Characteristics of Alkaloids 380
    7.1.7 General Methods of Extraction and Isolation of Alkaloids 389
  7.2 Classification of Alkaloids 395
    7.2.1 Alkaloids Derived from Amination Reactions 401
    7.2.2 Alkaloids Derived from Anthranilic Acid 427
  7.3 Alkaloids 490-500
* Further Reading References 500
### Contents

10. INDIAN TRADITIONAL HERBAL DRUGS 608–615
   10.1 Introduction 608
   10.2 Indian Traditional Herbal Drugs 609
      10.2.1 Cardiovascular Drugs 609
      10.2.2 Immunomodulators and Adaptogens 611
      10.2.3 Antidiabetic Drugs 611
      10.2.4 Antineoplastic Drugs 612
      10.2.5 Antiviral Drugs 613
      * Further Reading References 615

11. DRUGS OF MINERAL ORIGIN 616–632
   11.1 Introduction 616
   11.2 Important Drugs of Mineral Origin 618
      11.2.1 Kaolin [Synonyms: China Clay, Porelain Clay, Native Hydrated Aluminium Silicate] 618
      11.2.2 Asbestos 620
      11.2.3 Bentonite [Synonyms: W kinite] 621
      11.2.4 Talc [Synonyms: Purified Talc, French Talc, Talcum, Soap Stone] 622
      11.2.5 Fuller’s Earth [Synonyms: Floridin, Mutilani Mitti] 624
      11.2.6 Kieselguhr [Synonyms: Diatomaceous Earth, Celite Superpel Purified Industrial Earth] 625
      11.2.7 Prepared Chalk [Synonyms: Chalk, Creta, Paris-White, Whiting, English White] 626
      11.2.8 Calamine [Synonyms: Prepared Calamine] 626
      11.2.9 Shilajit 627
      11.2.10 Mica 628
      11.2.11 Paraffins [Synonyms: Liquid Petrolactum, White Mineral Oil] 629
      * Further Reading References 632

12. PHYTOCHEMICAL SCREENING 633–650
   12.1 Introduction 633
   12.2 Preparation of Extracts 634
      12.2.1 Divergent Extraction Processes 635
   12.3 Highly Sophisticated Extraction Modalities 640
   12.4 Phytochemical Screening 643
   12.5 Identification of Plant Constituents 645
      * Further Reading References 650
13. FIBRES 651-661
13.1 Introduction 651
13.2 Classification of Fibres 652
  13.2.1 Pericycle Fibres 652
  13.2.2 Xylem Fibres 653
  13.2.3 Phloem Fibres 656
  13.2.4 Miscellaneous Tissue Fibres 659
  * Further Reading References 661

14. ANALYTICAL PHARMACOGNOSY 662-680
14.1 Introduction 662
14.2 Adulteration in Drugs 663
  14.2.1 Adulterant Variants 664
14.3 Evaluation of Crude Drugs 669
  14.3.1 Organoleptic Evaluation 670
  14.3.2 Microscopical Evaluation 670
  14.3.3 Chemical Evaluation 673
  14.3.4 Physical Evaluation 675
  * Further Reading References 680

15. PHARMACEUTICAL AIDS 681-691
15.1 Introduction 681
15.2 Classification of Pharmaceutical AIDS 682
  15.2.1 Crude Herbs 682
  15.2.2 Processed Herbs 683
  15.2.3 Herbal Formulations 685
  15.2.4 Nutraceuticals 686
15.3 Nutraceuticals (Pharmaceutical Aids in Major Human Ailments) 687
15.4 Contemporary Nutraceuticals 690
  * Further Reading References 691

16. PHYTOPHARMACEUTICALS: RETROSPECT AND PROSPECT 692-706
16.1 Introduction 692
16.2 Natural Plant Products vis-a-vis Templates (Chemical Models) 694
16.3 The Phytopharmaceuticals—A Great Commercial Success as Herbal Drugs 696
16.4 The Wonder Herbal Drugs 698
  * Further Reading References 706
17. EVALUATION OF HERBAL DRUGS

17.1 Introduction 707
17.2 Variants in Chromatography 708
• Further Reading References 714

18. CONCEPT OF STEREOISOMERISMS

18.1 Introduction 715
18.1.1 Structural Isomerism 716
18.1.2 Stereoisomerism 716
18.2 Terms Related to Stereochemistry 720
18.2.1 Chirality Profile 720
18.2.2 Elements of Symmetry 722
18.3 Compounds with More than one Chiral Centre 724
18.4 Specific Configuration for Compounds Containing More than one Chiral Centre 727
18.5 Stereoisomerism of Cyclic Compounds (Cyclosteroisomerism) 729
18.5.1 Cyclic Directionality of Constitutional Origin 730
18.5.2 Cyclic Directionality of Conformational Origin 731
18.6 Typical Examples of Stereoisomerism 732
• Further Reading References 733

19. MEDICINALLY IMPORTANT LIGNANS, QUASSINOIDS AND FLAVONOIDs: CHEMISTRY AND BIOGENESIS

19.1 Introduction 734
19.2 Lignans [Neolignans] 735
19.3 Lignans 738
19.3.1 Biological Source 738
19.3.2 Phenolic Variants of Lignans and Therapeutic Uses 739
19.3.3 Important Examples of Lignans 740
19.4 Quassinooids 742
19.4.1 Quassinoid-Containing Drugs 742
19.4.2 Quassin [Synonym: Nigakilactone D] 743
19.4.3 Azadirachtin 744
19.5 Flavonoids 745
19.5.1 Mixed Biogenesis in Flavonoids 745
19.5.2 Biogenetic Relationship of Flavonoids 746
19.5.3 General Biosynthesis of Flavonoids 747
• Further Reading References 749
20. AYURVEDIC DRUG PRODUCTS AND THEIR ASSAY METHODS 750-762

20.1 Introduction 750
  20.1.1 Ayurvedic Dosage Forms [Formulations] 751
  20.1.2 Ayurveda: Its Broader Perspective 751
  20.1.3 Historical Evidences of ‘Ayurveda’ 751

20.2 Ayurvedic Drugs [Herbal Products]: Name–Definition–Preparation–Remarks 755

20.3 Assay Methods [Standardization Procedure] of Ayurvedic Drug Products (Dosage Forms) 758
  20.3.1 Standardization of Raw Materials(s) 759
  20.3.2 Standardization of Specific Manufacturing Process 760

• Further Reading References 761
