

Second  
Edition

Textbook of  
**Pharmacognosy  
and  
Phytochemistry**

Biren Shah  
AK Seth

CBS Publishers & Distributors Pvt Ltd

**Chapter 11 Evaluation of Crude Drugs**

- Introduction
- Organoleptic Evaluation
- Microscopical Evaluation
- Chemical Evaluation
- Physical Evaluation
- Biological Evaluation

11

**Chapter 12 Biological Screening of Herbal Drugs**

- Introduction
- Need for Phytopharmacological Evaluation
- New Strategies for Evaluating Natural Products
- Errors in Screening Procedures
- Screening Methods for Analgesic Agents
- Screening Methods for Antidiabetic Agents
- Evaluation of Antidiarrhoeal Agents
- Screening Methods for Antifertility Agents
- Screening Methods for Anti-inflammatory Agents
- Screening Methods for Antipyretic Agents
- Screening Methods for Antiulcer Agents
- Screening Methods for Diuretic Agents
- Screening Methods for Hepatoprotective Agents
- Screening Methods for Wound-Healing Agents

12

**PART 5 Biogenesis of Phytopharmaceuticals**

145

**Chapter 13 General Biosynthetic Pathways of Secondary Metabolites**

147

|   |           |
|---|-----------|
| <b>General Biosynthetic Pathways of Secondary Metabolites</b> | <b>14</b> |
| Introduction  | 14        |
| The Building Blocks   | 14        |
| Biosynthesis of Carbohydrates                                 | 15        |
| Biosynthesis of Glycosides                                    | 15        |
| Biosynthesis of Alkaloids                                     | 15        |
| Biosynthesis of Phenolic Compounds                            | 16        |

## Pharmacognostical Study of Crude Drugs 163

|  |           |
|--|-----------|
| <b>Drugs Containing Carbohydrates and Derived Products</b> | <b>16</b> |
| Introduction   | 16        |
| Classification   | 16        |
| Tests for Carbohydrates                                    | 16        |
| Biosynthesis of Carbohydrates                              | 16        |
| Acacia Gum   | 16        |
| Guar Gum   | 17        |
| Honey  | 17        |
| Tragacanth   | 17        |
| Sodium Alginate  | 17        |
| Pectin   | 17        |
| Caraya Gum   | 17        |
| Gum Mastic   | 17        |
| Gum Arabic   | 18        |
| Gum Benzoin  | 18        |
| Gum Ghatti   | 18        |
| Gum Tragacanth   | 18        |

|                  |   |           |
|------------------|---|-----------|
| <b>Chapter 1</b> | <b>History, Definition and Scope of Pharmacognosy</b> | <b>4</b>  |
|                  | ■ Meaning of Pharmacognosy                            | 4         |
|                  | ■ Origin of Pharmacognosy                             | 4         |
|                  | ■ History of Pharmacognosy                            | 4         |
|                  | ■ Scope of Pharmacognosy                              | 8         |
|                  | ■ Future of Pharmacognosy                             | 8         |
|                  | ■ Pharmacognostical Scheme                            | 9         |
| <b>Chapter 2</b> | <b>Alternative Systems of Medicine</b>                | <b>10</b> |
|                  | ■ Introduction  | 10        |
|                  | ■ Traditional Chinese Medicine System                 | 11        |
|                  | ■ Indian Systems of Medicine                          | 12        |
|                  | ■ Siddha System of Medicine                           | 14        |
|                  | ■ Unani System of Medicine                            | 15        |
|                  | ■ Homoeopathic System of Medicine                     | 16        |
|                  | ■ Aromatherapy  | 18        |
|                  | ■ Bach Flower Remedies                                | 20        |
|                  | ■ Tibetan System of Medicine                          | 20        |
| <b>Chapter 3</b> | <b>Classification of Drugs of Natural Origin</b>      | <b>22</b> |
|                  | ■ Introduction  | 22        |
|                  | ■ Classification of Crude Drugs                       | 23        |

|   |            |
|---|------------|
| ■ Tamarind                                    | 187        |
| ■ Chitin                                      | 188        |
| ■ Carrageenan                                 | 189        |
| ■ Locust Bean Gum                             | 190        |
| ■ Starch                                      | 191        |
| <b>Chapter 15 Drugs Containing Alkaloids</b>  | <b>193</b> |
| ■ Introduction                                | 193        |
| ■ Definition                                  | 194        |
| ■ History                                     | 194        |
| ■ Classification                              | 194        |
| ■ Occurrence in Nature                        | 195        |
| ■ Properties                                  | 197        |
| ■ Extraction                                  | 197        |
| ■ Chemical Tests                              | 198        |
| ■ Tropane Alkaloids                           | 198        |
| ■ Belladonna                                  | 198        |
| ■ Datura Herb                                 | 200        |
| ■ Stramonium                                  | 201        |
| ■ Hyoscyamus                                  | 203        |
| ■ Coca Leaves                                 | 205        |
| ■ Duboisia                                    | 206        |
| ■ Indole Alkaloids                            | 207        |
| ■ Ergot                                       | 207        |
| ■ Rauwolfia                                   | 209        |
| ■ Nux Vomica                                  | 212        |
| ■ Vinca                                       | 215        |
| ■ Physostigma                                 | 217        |
| ■ Pyridine and Piperidine Alkaloids           | 218        |
| ■ Lobelia                                     | 218        |
| ■ Tobacco                                     | 219        |
| ■ Areca Nuts                                  | 220        |
| ■ Imidazole Alkaloids                         | 221        |
| ■ Pilocarpus                                  | 221        |
| ■ Quinoline Alkaloids                         | 222        |
| ■ Cinchona                                    | 222        |
| ■ Isoquinoline Alkaloids                      | 225        |
| ■ Ipecac                                      | 225        |
| ■ Opium                                       | 228        |
| ■ Curare                                      | 230        |
| ■ Steroidal Alkaloids                         | 230        |
| ■ Veratrum                                    | 230        |
| ■ Kurchi Bark                                 | 231        |
| ■ Ashwagandha                                 | 231        |
| ■ Purine Alkaloids                            | 231        |
| ■ Coffee                                      | 231        |
| ■ Tea   | 231        |
| ■ Cocoa                                       | 231        |
| ■ Diterpene Alkaloids                         | 231        |
| ■ Aconite                                     | 231        |
| ■ Amino Alkaloids                             | 241        |
| ■ Ephedra                                     | 241        |
| ■ Colchicum                                   | 241        |
| <b>Chapter 16 Drugs Containing Glycosides</b> | <b>241</b> |
| ■ Introduction                                | 241        |
| ■ Classification                              | 241        |

- Labiatae
- Leguminosae
- Liliaceae
- Papaveraceae
- Rubiaceae
- Rutaceae
- Scrophulariaceae
- Solanaceae
- Umbelliferae

### **PART 3 Cultivation, Collection, Production and Utilization of Herbal Drugs**

#### **Chapter 6 Cultivation, Collection and Processing of Herbal Drugs**

- Introduction
- Soils, Seeds and Propagation Material
- Good Agricultural Practices
- Factors Affecting Cultivation
- Plant Hormones and Growth Regulators
- Collection of Crude Drugs
- Harvesting of Crude Drugs
- Drying of Crude Drugs
- Garbling (Dressing)
- Packing of Crude Drugs
- Storage of Crude Drugs
- Quality Management
- Documentation

#### **Chapter 7 Indian Trade in Medicinal and Aromatic Plants**

- Introduction
- Indian Herbal Trade in World Scenario
- Medicinal Plant-Based Industries in Indigenous System of Medicine
- Export Potential of Indian Phytopharmaceutical Products
- Indian Medicinal Plants Used in Cosmetic and Aromatherapy
- Indian Medicinal Plants in Crude Form
- Spices
- Export of Spices From India

#### **Chapter 8 Utilization of Aromatic Plants and Derived Products**

- Introduction
- Impact of Industrialization
- Toxicity of Essential Oils
- Utilization of Aromatic Plants

#### **Chapter 9 Role of Medicinal Plants in National Economy**

- Introduction
- Economic Growth Potential in Natural Health and Cosmetic Products
- Future Economic Growth
- Development of Herbal Medicinal Industry
- Contribution to Economy of the People

### **PART 4 Analytical Pharmacognosy**

#### **Chapter 10 Drug Adulteration**

- Introduction
- Adulteration

|  |            |
|--|------------|
| ■ Distribution of Glycosides                     | 245        |
| ■ Chemical Tests of Glycosides                   | 245        |
| ■ Isolation                                      | 247        |
| ■ Anthracene Glycosides                          | 247        |
| ■ Senna Leaf                                     | 248        |
| ■ Aloe   | 251        |
| ■ Rhubarb  | 253        |
| ■ Cascara Bark                                   | 256        |
| ■ Frangula                                       | 258        |
| ■ Sterol or Cardiac Glycosides                   | 259        |
| ■ Digitalis Leaves                               | 260        |
| ■ <i>Digitalis lanata</i>                        | 263        |
| ■ Thevetia                                       | 264        |
| ■ Squill   | 265        |
| ■ Red Squill                                     | 266        |
| ■ Indian Squill                                  | 266        |
| ■ Strophanthus                                   | 267        |
| ■ Oleander                                       | 268        |
| ■ Saponin Glycosides                             | 269        |
| ■ Dioscorea                                      | 270        |
| ■ Liquorice                                      | 271        |
| ■ Shatavari                                      | 274        |
| ■ Brahmi   | 275        |
| ■ Ginseng  | 277        |
| ■ Senega   | 278        |
| ■ Quillaia                                       | 279        |
| ■ Gokhru   | 280        |
| ■ Sarsaparilla                                   | 282        |
| ■ Cyanogenic Glycosides                          | 282        |
| ■ Almond   | 283        |
| ■ Wild Cherry Bark                               | 284        |
| ■ Isothiocyanate Glycosides                      | 284        |
| ■ Mustard  | 284        |
| ■ Flavone Glycosides                             | 285        |
| ■ Ginkgo   | 285        |
| ■ Coumarin and Furanocoumarin Glycosides         | 286        |
| ■ Visnaga  | 286        |
| ■ Ammi   | 287        |
| ■ Psoralea                                       | 288        |
| ■ Aldehyde Glycosides                            | 289        |
| ■ Vanilla  | 289        |
| ■ Phenol Glycosides                              | 290        |
| ■ Bearberry                                      | 290        |
| ■ Steroidal Glycosides                           | 290        |
| ■ Solanum  | 290        |
| ■ Bitter and Miscellaneous Glycosides            | 291        |
| ■ Gentian  | 291        |
| ■ Picrorhiza                                     | 292        |

- Condensed Tannins
- Ashoka
- Pale Catechu
- Black Catechu
- Pterocarpus

### **Chapter 21 Enzymes and Protein Drugs**

- Enzymes
- Diastase
- Pepsin
- Pancreatin
- Trypsin
- Hyaluronidase
- Urokinase
- Streptokinase
- Bromelin
- Serratiopeptidase
- Papain
- Proteins
- Malt Extract
- Gelatin
- Casein
- Collagen
- Ficin

### **Chapter 22 Fibres, Sutures and Surgical Dressings**

- Introduction
- History
- Classification and Properties
- Vegetable Fibres
- Cotton
- Jute
- Flax
- Hemp
- Animal Fibres
- Silk
- Wool
- Regenerated and Synthetic Fibres
- Viscose
- Alginate Fibres
- Nylon
- Terylene (Dacron)
- Orlon
- Surgical Dressings
- Sutures and Ligatures

### **Chapter 23 Drugs of Mineral Origin**

- Introduction
- Kaolin
- Asbestos
- Talc
- Bentonite

**PART 7 Extraction, Isolation and Purification of Herbal Drugs 433**

**Chapter 24 General Methods for Extraction, Isolation and Identification of Herbal Drugs 435**

- Introduction 435
- Extraction Methods 435
- Types of Extracts 439
- Isolation and Identification of Natural Products 440

**Chapter 25 Isolation of Phytopharmaceuticals 446**

- Introduction 446
- Isolation of Atropine 447
- Isolation of Andrographolide 447
- Isolation of Bacosides 448
- Isolation of Caffeine 448
- Isolation of Camphor 449
- Isolation of Capsaicin 449
- Isolation of Colchicine 450
- Isolation of Curcumin 450
- Isolation of Digoxin 451
- Isolation of Diosgenin 451
- Isolation of Emetine 452
- Isolation of Ergometrine 452
- Isolation of Eugenol 453
- Isolation of Gingerols and Shogaols 453
- Isolation of Glycyrrhetic Acid 454
- Isolation of Guggulsterone 454
- Isolation of Hesperidin 455
- Isolation of Levodopa 455
- Isolation of Menthol 456
- Isolation of Nicotine 456
- Isolation of Opium Alkaloids 457
- Isolation of Piperine 457
- Isolation of Podophyllotoxin 458
- Isolation of Quinine and Quinidine 458
- Isolation of Reserpine 459
- Isolation of Sennosides 460
- Isolation of Solasodine 461
- Isolation of Strychnine and Brucine 461
- Isolation of Vasicine 462
- Isolation of Vinca Alkaloids 462

**PART 8 Medicinal Plant Biotechnology 465**

**Chapter 26 Plant Tissue Culture 467**

- Introduction 467
- History 468
- Basic Requirements for a Tissue Culture Laboratory 470
- General Procedures Involved in Plant Tissue Culture 471
- Culture Media 473
- Types of Plant Tissue Cultures 477
- Establishment and Maintenance of Various Cultures 479
- Applications of Plant Tissue Culture 482
