

## قائمة بالمشروعات البحثية الممولة

| المبلغ    | الممول           | الفترة الزمنية | أسماء الباحثون   | عنوان المشروع  |
|-----------|------------------|----------------|--|--|
| 100000 LE | Tanta university | 2007-2009      | Dr.Amal Kabash   | Studies on the genetic effects of some plant extracts used as natural food preservative                      |
| 98000 LE  | Tanta university | 2 years        | Prof.dr.Mokhtar M. Mabrook   | Synthesis and antimicrobial activities of some polymer-heterocyclic compounds conjugates for water treatment |
| 30000 LE  | Tanta university | One year       | Pro.dr. Alaa E. Alsisi<br>Prof.dr. Samia Soker<br>Dr.Sally Abo Risha | Antitumor activity of immunomodulating agents  |

|           |                  |           |                                  |   |
|-----------|------------------|-----------|----------------------------------|---|
| 100000 LE | Tanta university | 2 years   | Pro.dr. Tarek El Banaa           | Antimicrobial activity of some polymeric materials on some selected human pathogenic microorganisms                                 |
| 100000 LE | Tanta university | 18 months | Pro.dr. Kamelia M. Abo El Soaad. | Novel indirect solar dryer design to dry medical plants using PCM as storage medium   |
| 100000 LE | Tanta university | 2 years   | Prof.dr. Nahla El Ashmawy        | The use of laboratory techniques in the cultivation of stem cells for specialized cells used in the treatment of different diseases |
